

RAUL STELEAC

+44(0)7810733403 | raul.steleac@ed.ac.uk | Edinburgh, EH11

EDUCATION

University of Edinburgh

PhD in Robotics and Autonomous Systems

- Supervisor: Mohan Sridharan

Edinburgh, United Kingdom

Sept. 2023 – Present

Imperial College London

MSc in Computing (Artificial Intelligence and Machine Learning)

- Grade: **Distinction**

London, United Kingdom

Oct. 2020 – Oct. 2021

Polytechnic University Timisoara

BEng in Computers and Information Technology

- Grade: 10.0/10.0 thesis final grade and 9.20/10.0 module average grade.
- Received merit scholarships in 7 out of the 8 semesters.

Timisoara, Romania

Sept. 2016 – July 2020

“Grigore Moisil” Theoretical High School

- Grade: 9.85/10.0 (Mathematics), 9.70/10.0 (Computer Science), 9.48/10.0 (Final mark).
- Received merit scholarships in two out of the four years of study.

Timisoara, Romania

Sept. 2012 – June 2016

PROFESSIONAL EXPERIENCE

Research Intern (RL)

Dematic

- Developed, implemented, and evaluated Hierarchical Multi-Agent Reinforcement Learning (MARL) algorithms within a specialised and realistic warehouse simulation environment.
- Successfully enhanced MARL algorithms to achieve higher deliveries per hour than industry-standard heuristic approaches, demonstrating improved warehouse operational performance.

May 2023 – Dec. 2024

Edinburgh, United Kingdom

Machine Learning Scientist (NLP)

SenseStreet

- Developed transformer-based architectures for a natural-language processing pipeline that extracts valuable financial information from anonymised chats between investment banking officials and clients aiming to assist traders in their daily transactions leading to more efficient and precise deals.

Jan. 2021 – Aug. 2023

London, United Kingdom

Machine Learning Engineer (NLP)

Healx

- Designed and implemented a Contextual Entity Linking transformer-based architecture that successfully disambiguates and maps in-sentence entities to internal biomedical ontologies.
- Constructed a noise-aware training method that uses ensemble models to build loss-masks for Named Entity Recognition training, increasing the F1 score of the production model by 7.5%.

Nov. 2021 – Jan. 2023

Cambridge, United Kingdom

Software Development Intern

Intel Software Development

- Contributed to the development of two versions of the Intel Movidius Visual Processing Unit chip, used to accelerate computations inside neural networks for real-time applications like drones and robots.
- Collaborated with other development teams to incorporate novel features in the final chip architecture.

Dec. 2018 – Aug. 2020

Timisoara, Romania

Junior Software Developer

Nokia Networks

Oct. 2017 – Dec. 2018

Timisoara, Romania

- Investigated and solved software issues using Object-Oriented methodologies in C++, while working in the Fault detection and Alarm Raising department.
- Effective time management was required to solve software bugs with the shortest delay possible.

Volunteer

Timisoara Science Festival

Sept. 2018

Timisoara, Romania

- Presented a physics experiment named Hydrodynamic Levitation to a public from a variety of age groups and backgrounds during the international educational event..

PUBLICATIONS

Conferences and Journals

- **Raul D. Steleac**, Mohan Sridharan and David Abel; "Inter-Agent Relative Representations for Multi-Agent Option Discovery", in **ICLR** 2026.
- A. Krnjaic, **Raul D. Steleac**, J. D. Thomas, G. Papoudakis, L. Schäfer, A. W. Keung To, K. Lao, M. Cubuktepe, M. Haley, P. Börsting and S. V. Albrecht; "Scalable Multi-Agent Reinforcement Learning for Warehouse Logistics with Robotic and Human Co-Workers", in **IROS** 2024.

Theses

- **Raul D. Steleac**, "Curriculum Reinforcement Learning: Re-visiting Tabular Methods", Master's Thesis, Imperial College London, 2021
- **Raul D. Steleac**, "End-to-end Speech Emotion Recognition", Bachelor's Thesis, Polytechnic University Timisoara, 2020

TECHNICAL SKILLS

Programming languages: Python, SQL, C++, C, Java, Makefile, Bash (Linux Shell Scripting), Prolog, Latex

Frameworks: Jax, PyTorch, HuggingFace, TensorFlow, Keras

Developer Tools: Git, AWS, Docker, CircleCI, Jira, Google Cloud Platform, BigQuery, Airflow

Libraries: NumPy, Pandas, PyDantic, pytest, MuJoCo, Matplotlib, Librosa
